

Bring Authentic Buddhist Teachings to Every Device

Why Modernise Dharma Learning?

Today’s practitioners expect to learn from anywhere — to follow a course, watch a live teaching, find a centre and join an event from their phone. Yet most teaching organizations spread their presence across a website, a video channel, newsletters and manual sign-up sheets: a fragmented experience for students and hours of manual work for the team.

The AVI Learning Platform brings it all into one place: a single mobile app for teachings, courses, live broadcasts, events, centres and giving, with an always-available AI assistant — and one web console to publish everything, on a secure, scalable AWS foundation.

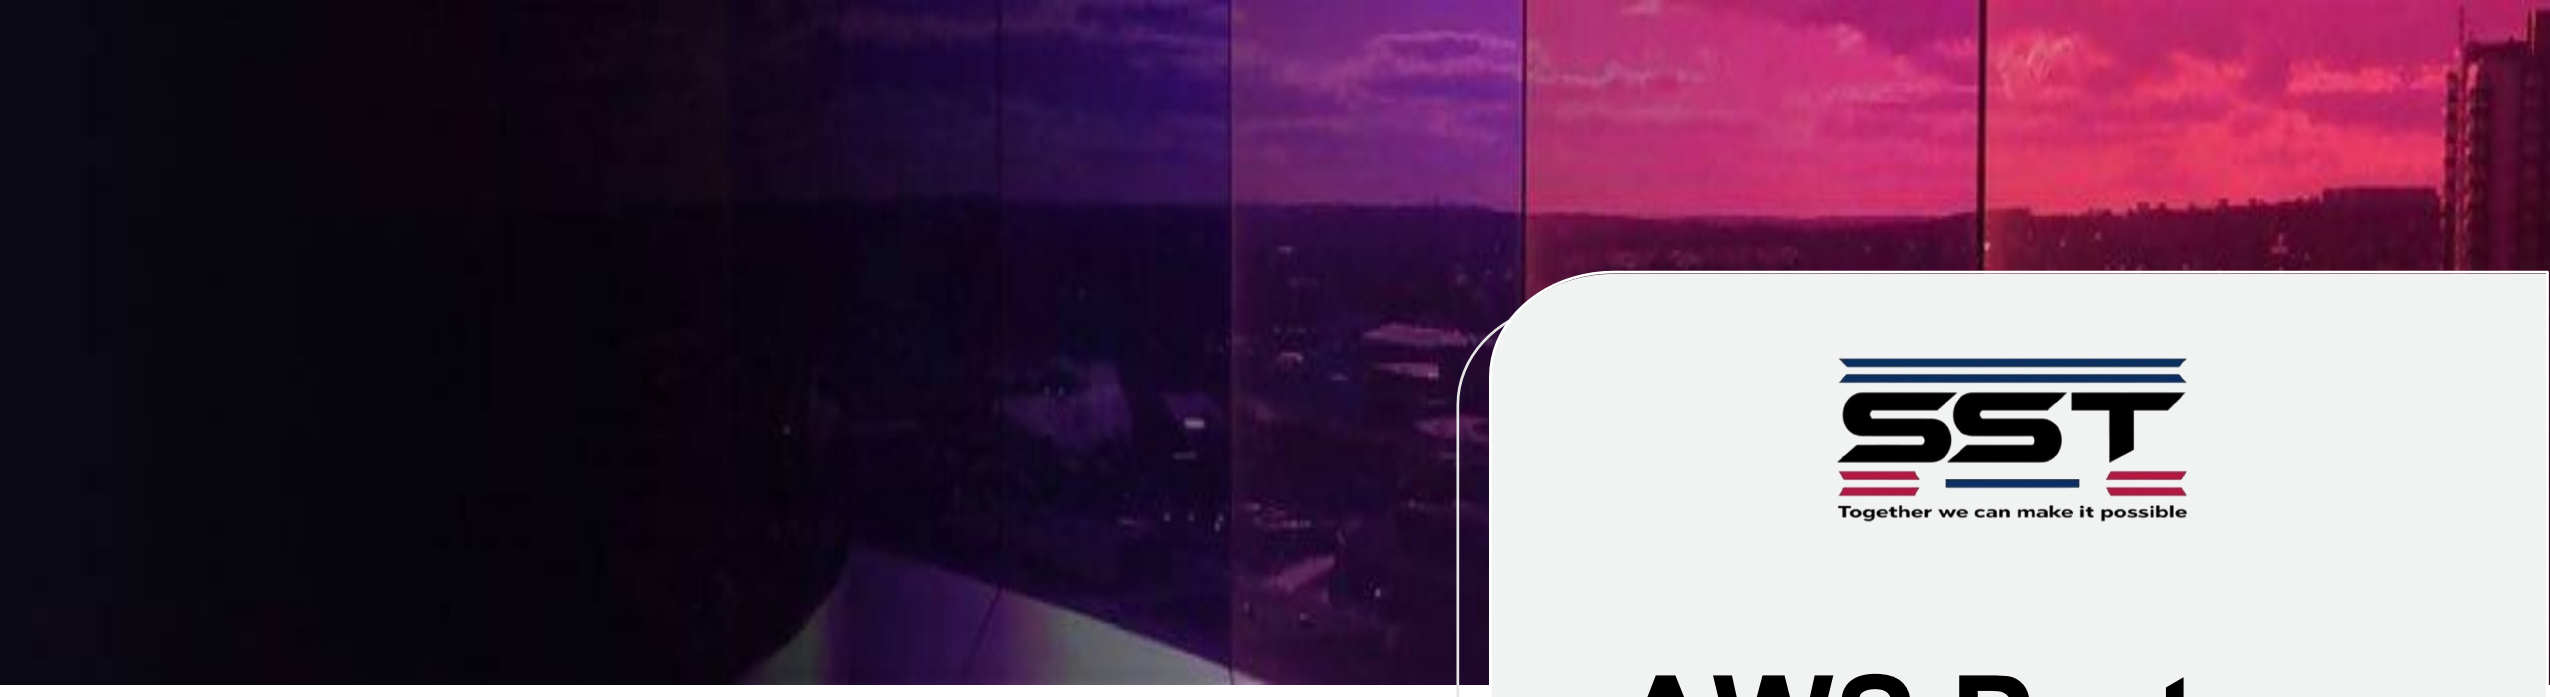

Benefits

- **One App for the Whole Community —**
  Courses, teachings, live broadcasts, events, centres and donations in one Android and iOS app — students pick up where they left off.
- **Guidance That’s Always On —**
  A Bedrock-powered AI assistant answers questions and responds to personal topics with warmth, protected by Amazon Bedrock Guardrails.
- **Never Miss a Teaching —**
  Real-time push notifications announce new courses and events and open the app straight to the right screen.
- **Publish from One Console, Securely —**
  A web console manages courses, lessons and events in one database, on a secure, containerised AWS deployment.

The comprehensive path to a modern dharma platform

Amazon Web Services provides Awakening Vajra International with a secure, scalable and fully managed cloud foundation — avoiding the complexity of running AI and application infrastructure, with enterprise-grade security and foundation models via Amazon Bedrock.

Combined with Anthropic Claude and Amazon Titan on Amazon Bedrock, Bedrock Guardrails and Amazon SNS on Amazon EC2, SST delivers a best-of-breed, AI-assisted learning stack.

AWS Partner Promotion

Shri Sai Tech's AI-Assisted Learning Platform on AWS helps teaching organizations bring their entire programme — courses, teachings, events, live broadcasts and community — into one secure mobile and web experience.

Built on Amazon Bedrock with responsible-AI guardrails and Amazon SNS push notifications, the AVI Learning Platform gives students a single place to learn and the organization a single place to publish — delivered as a production-ready proof of concept on AWS.

Call to Action

Comprehensive Capabilities for Teaching Organizations

- **Cross-Platform Mobile App** –
  A React Native app for Android and iOS: Teachings, Courses, Live Broadcast, Events, Centres, Donations, Profile and My Activity.
- **AI Teaching Assistant** –
  An Amazon Bedrock assistant for course, event and app questions, governed by Amazon Bedrock Guardrails.
- **Push Notifications & Deep Linking** –
  Amazon SNS with Firebase pushes new teachings and events and opens the right screen in the app.
- **Admin Console and Unified Backend** –
  A Next.js console and FastAPI service on PostgreSQL — one secure source of truth for all content.
